Asia-Pacific Projects Review

"The last financial year has seen a large growth for both Della Toffola Pacific and FB Propak in the Asia-Pacific region. Significant investment into expanding our technical and engineering divisions has enhanced our existing commercial relationships with key beverage and food entities, as well as new relationships with some the industry's most respected and premium businesses. 2013-2014 also saw a period of many firsts for our region, across many industries. These key innovations and engineering were primarily delivered by both Della Toffola Pacific and FB Propak, and have reinforced our position as one of the most progressive technical food and beverage suppliers, engineers and authorities."

-Paul Baggio, CEO - Della Toffola Pacific and FB Propak
