

MADE
IN GOOD
SPIRITS

 **FRILLI**

MADE IN GOOD SPIRITS

Since 1912 Frilli has been supplying worldwide in-house designed and manufactured bespoke continuous and batch distillation plants

operating from vacuum through to pressurized conditions. These plants range from small to large capacities. Frilli believes that satisfied customers are the only form of advertising worth investing in. When working with Frilli you will be met with courtesy, professionalism, quality advice and all questions answered.

NOWADAYS

In the last years, the company has been operating with great success in the field of Whisky and Gin, by designing, manufacturing and supplying both continuous plants with columns and discontinuous pot stills (from 0,5 up to 50 m³ of working capacity) with traditional onion shape, especially in Scotland, Ireland, Usa, Australia and Russia.

We have also recently designed a state-of-the-art technology plant for Rum production able to produce any kind of style, from the heavier up to the lighter.

TAILOR MADE ACTIVITIES

FRILLI IS A COMPANY SPECIALIZED IN
DISTILLATION PLANTS USING HIS KNOW
HOW AND TECHNOLOGIES FOR THE
PRODUCTION OF ALCOHOL DISTILLATES

DESIGN

both basic and detailed engineering,
related to the process and utilities, are
developed by our internal group of
specialists with proven experiences

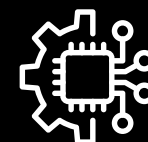

CONSTRUCTION

The core parts of our plants are whole
in-house designed and manufactured,
allowing complete control of the
production and the supply chain

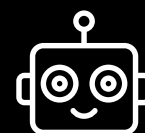

SUPPLY

The complementary materials and
equipment are instead purchased on
the national and European markets,
exclusively from highly qualified
suppliers

REVAMPING

Frilli is able to turn old systems into
modern plants, recovering as much as
possible of the existing equipment

POINTS OF STRENGTH

IN HIGHLY COMPETITIVE SCENARIO, THE COMPANY GUARANTEES BENEFITS AND OPPORTUNITIES THANKS TO THE WHOLE IN-HOUSE DESIGNED PROCESS THAT MAKES THE CHOICE EVEN MORE EASY AND SAFE

TAILOR MADE

Like a tailor made dress, Frilli designs and builds the best solution for your needs.

ENERGY SAVING

This is the house speciality. Thanks to continuous R&D, we always guarantee the opportunity to benefit of cutting-edge technologies that make the plants eco-friendly and able to produce spirits, without compromising on quality, at the lowest energy consumption on the market

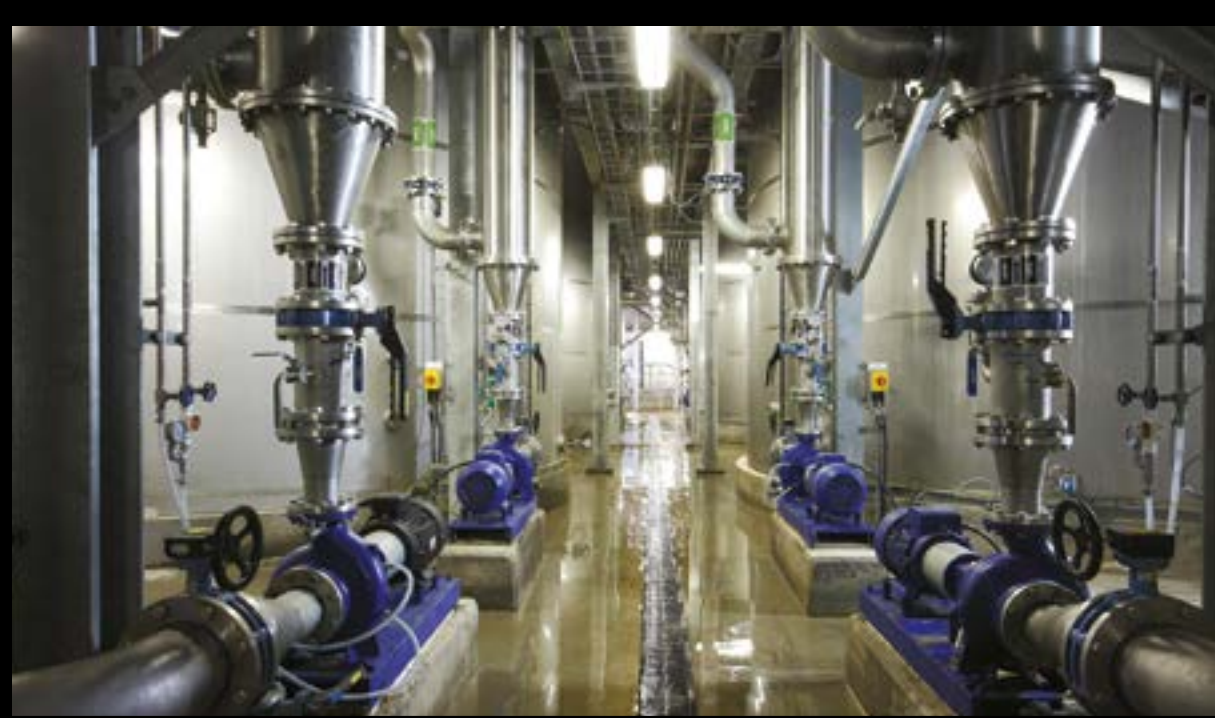

LOYALTY

The customer relationship never ends! Who chooses Frilli knows we are always available.

QUALITY/PRICE RATIO

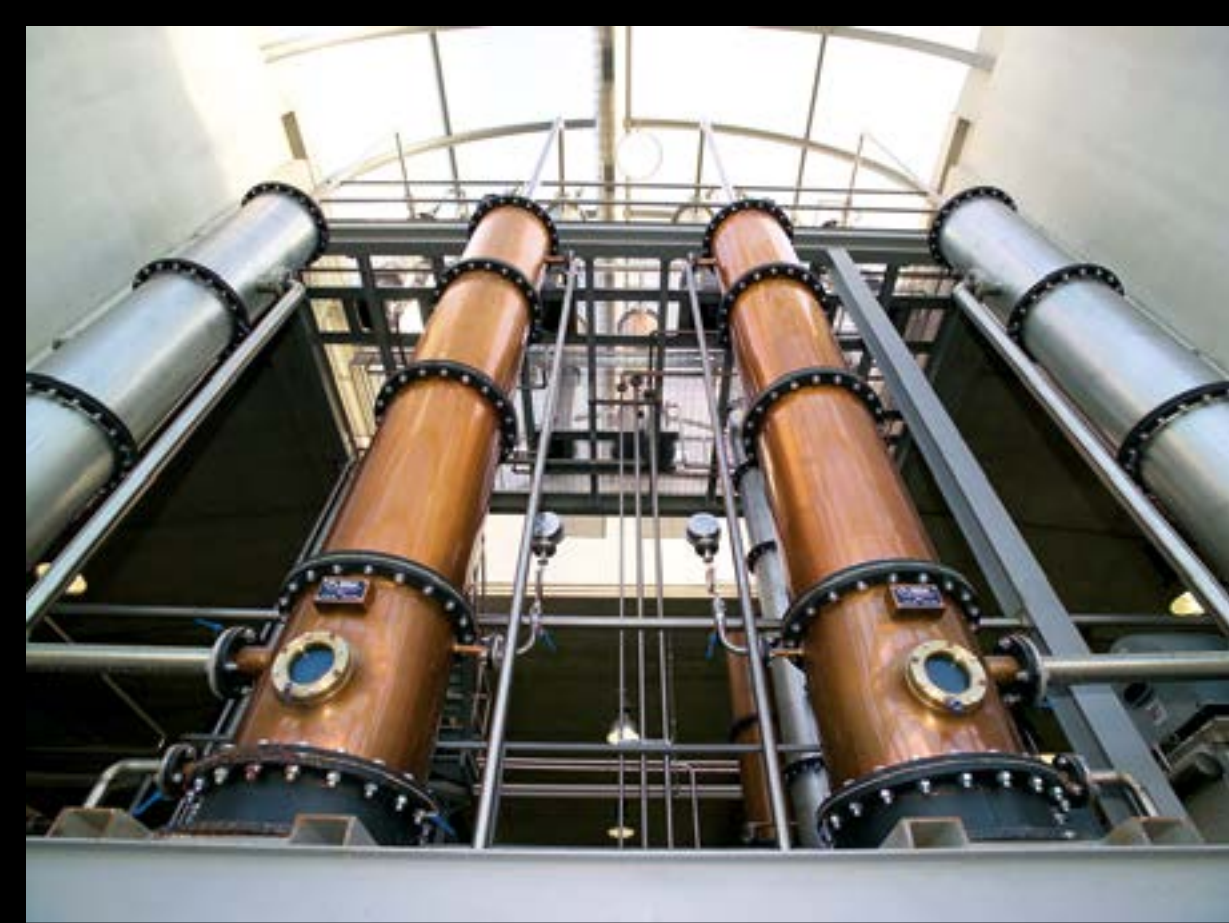

The plants efficiency, their reliability, the constant support: everything for competitive price.
